

ABSTRACT OF THE DISCLOSURE

A signaling system is provided for rendering an alarm for an individual in distress
5 combined with a locating and tracking system to thus alert and direct appropriate
personnel to the needs of the individual in distress and to monitor the location of that
individual. The system comprises a portable signaling unit, a remote alarm switch device,
a central dispatch station, and makes use of a wireless communication system. The
portable signaling unit and the remote alarm switch may be adapted to be worn at
10 different locations on the person's body. The remote alarm switch may be concealed in the
form of a wristband or in the form of any other object such as a broach, pendant, or
keychain.
